VENTURE HACKS

For the 2026 edition of NSBEHacks, we invite participants to step into the world of startups, innovation, and venture creation. Hack Ventures challenges students to think beyond ideas and focus on building scalable solutions that can grow, attract investment, and create real world impact.

Challenges

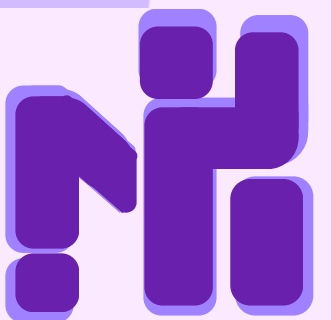

- **BFN Venture Challenge:**

- The goal is to build something meaningful that supports the black community.

- **Ripple XRP Challenge:**

- Build a testable MVP that is publicly available.

Meet our Judges

Ayomide Ajayi

Sustainability Engineering Intern @ Cyclic Materials
Ex-President of NSBE UofT Chapter

Muhammed Yakubu

Member of Technical Staff @ Cerebras

Philip Asare

Professor, Dean's Advisor on EDI

Genevieve Aguigwo

Project Engineer @ PepsiCo

Ripply Challenge Judges

Roa Brahimi

Software Engineer @ Ripple

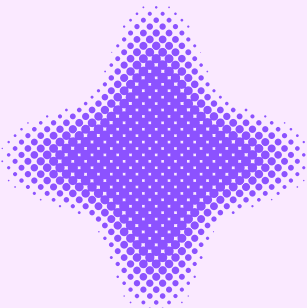

Varun Sharma

Senior Software Engineer @ Ripple

Angel Gutierrez

Senior Software Engineer @ Ripple

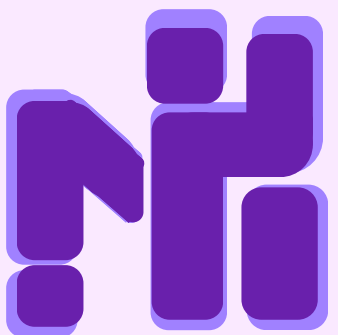

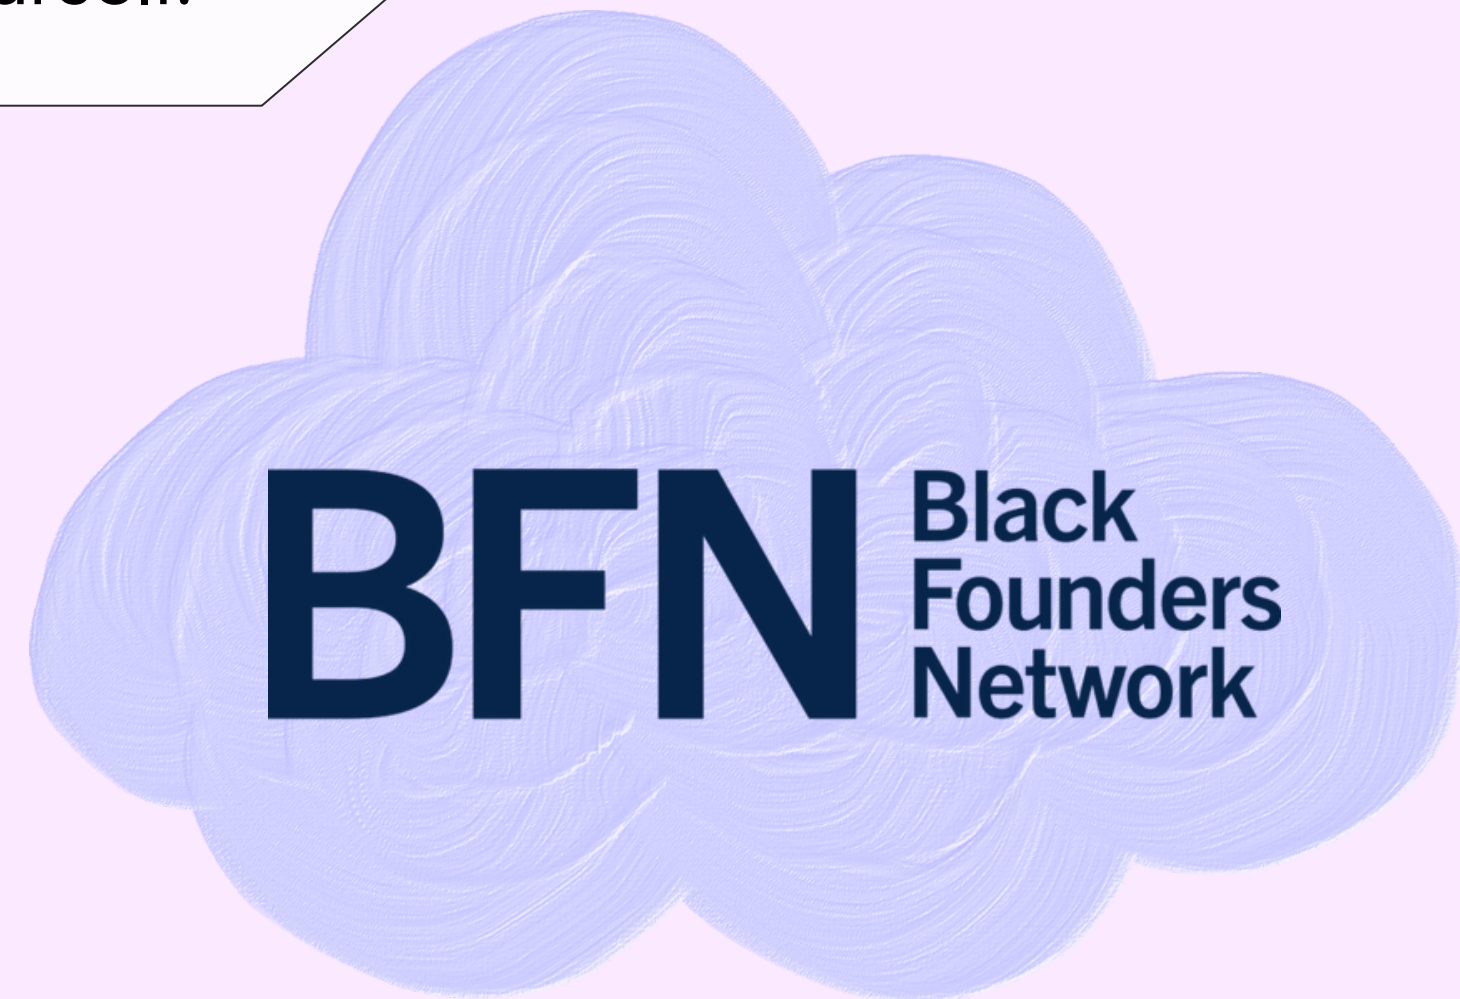

BFN Venture Challenge

An opportunity to understand venture culture, pitch a startup idea and build a prototype to market yourself.

Structure:

- **Define a problem**
- **Develop a prototype**
- **Evaluate efficacy in benefitting the black community**

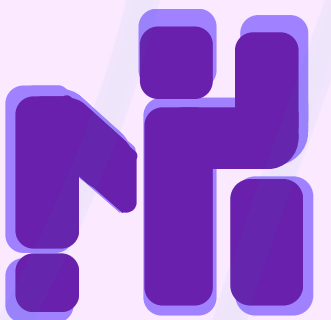

Ripple XRP Challenge

- **Challenge Statement:**

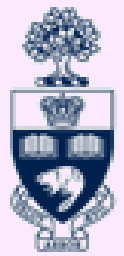

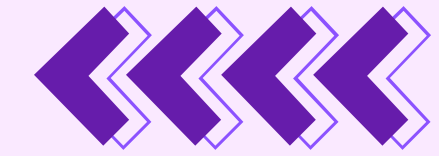

- Build an MVP that leverages the XRP Ledger's core features to solve a real-world problem. We're seeking innovative solutions with a variety of use-cases. If you don't know where to start, we're especially interested in applications around DeFi, privacy, and programmability.

**TO COMPETE, YOU MUST SUBMIT A
WORKING, TESTABLE MVP THAT IS
PUBLICLY AVAILABLE ON GITHUB
WITH A DETAILED README.**
